

Word Equations AE

1. chromium (II) chloride + silver acetate yields chromium (II) acetate + silver chloride
2. ammonium sulfate + sodium carbonate yields ammonium carbonate + sodium sulfate
3. magnesium metal + copper (II) oxide yields magnesium oxide + copper metal
4. aluminum metal + copper (II) chloride yields aluminum chloride + copper metal
5. lithium chlorate when heated yields lithium chloride and oxygen gas
6. potassium chloride + silver nitrate yields potassium nitrate + silver chloride
7. aluminum sulfate + sodium chlorite yields aluminum chlorite + sodium sulfate
8. iron metal + copper (II) hydroxide yields iron (III) hydroxide + copper metal
9. sodium metal + lead (II) chloride yields sodium chloride + lead metal
10. sodium chlorate when heated yields sodium chloride and oxygen gas
